

Thinwall SERIES FS-3-GS-C

- Standard stock height up to 10'0".
- Choice of 39" or 52" High Lower Panel, glass or other insert and variable conversion header.
- Module range—12" to 72" in width—in increments of 6 inches.

This combination panel and glass series affords complete privacy from all outside corridor or area activity—yet the Broadlite glass insert achieves a lightness in atmosphere without sacrifice of privacy.

*.....“Design Engineered” to enable

Thinwall

Ceiling High Series adapt to any ceiling condition or required height.

- Improved sound controlled.
- Engineered for wiring, ease of installation and movability.
- Simplicity in concept and component parts.
- Total variety of panel combinations.
- Complete **salvagability** of all components.

These are **Thinwall**
BASICS

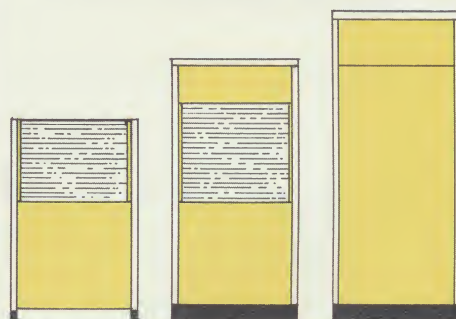

STEEL or PLASTIC

STEEL SERIES—
9 standard in stock durable decorator colors are available for Thinwall quick delivery.

DESIGNER SERIES—
Walnut has been selected as the standard wood grain. Other patterns are available.

TOTAL PACKAGE CONCEPT

Thinwalls are available in **ALL** heights and all combinations from 39" in height up to 10'0" in either the steel or plastic series.

Thinwall SERIES FS-8-5-C

- Standard stock heights up to 10'0".
- Eighty six inch high Lower Panel.
- Variable Top Filler.
- Module range—12" to 48" in width in increments of 6 inches.

The full height flush wall is ideal for the ultimate in privacy. Here transference of sound is reduced to a minimum, lending a thinking atmosphere that all such areas as these must have.

...you to create and relocate your divided areas with you

CHOICE OF DOOR TYPES

GLAZED

FLUSH

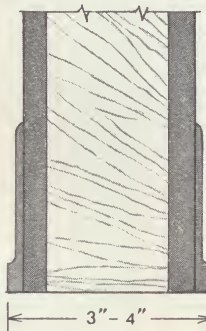

PLASTIC
LAMINATED

Available in 2 widths, 30" and 36"
Completely equipped with hardware and
butts.

Requires Less Floor Space

1 3/4"

3" - 4"

Approximately 14.5% more floor space
is required for heavier wall systems and
dry wall than is required by THINWALL.

When you install
you are installing a wall system that can be
moved, re-arranged and relocated by your
own men.

The costly delays of waiting for "a factory
man" to accomplish your move is elimi-
nated.

Our intent when we designed Thinwall was
to give you a wall system so simple that
regardless of the factor involved, they
would save you time and money.

—ADAN LOCK JAMESTON

Thinwall SERIES GCW-S-C

- Standard stock heights up to 10'0"
- Glass height—86"
- Variable conversion header.
- Module range—12" to 48" in increments of 6 inches.

The full height glass curtain wall shown here achieves a high styled contemporary lightness for striking reception areas and prestige executive offices.

COMPLETE INTERMEMBERING

Thinwall — by Adanlock — offers a series of wall systems so totally engineered that regardless of the height, the panel combinations or the series (steel or plastic) they completely intermember.

- Office Divider to Ceiling High
- Cornice High to Office Divider
- Steel to Plastic (and vice versa)

There is no limitation — you have freedom of layout which can be enjoyed only when you use Adanlock Thinwalls.

OWN CORPORATION — *Thinwall*

Thinwall SERIES FS-8-GS-C

- Standard stock height up to 10'0".
- Eighty six inch high lower panel.
- Variable glass insert.
- Variable conversion header.

BASIC VALUES

• ATTRACTIVE APPEARANCE

The Thinwall ceiling high wall system just one and three quarters thick is the perfect background for **every** decorator concept.

• FLEXIBILITY

Re-arrangement of space is met with a minimum of expense and interruption.

• UTILITY ACCESS

Quick efficient access to utilities — Wiring and additional outlets can be located in the panels, posts or bases.

• LOW MAINTENANCE

The durable finishes stay bright and attractive with a simple "soap and water" cleaning.

• EARLY OCCUPANCY

With Thinwall the need for plastering, painting and hand-fitting is completely eliminated; thus occupancy is sooner, resulting in an earlier return on your investment.

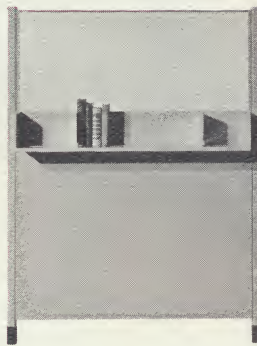

The flush lower wall affords the maximum in privacy from all outside activity and the effective use of the glass insert allows additional light into the area.
